

Table of Contents

About the Workbook and Exercises	1
Before You Begin	2
Chapter 1: Mapping and Digital Data Fundamentals	3
Mapping Fundamentals	
GIS Fundamentals	
Chapter 2: The Vermont Interactive Map Viewer	12
An Online GIS Application Example	
The GIS Interface	
Mapping Exercise: Locate VCGI Using the Basemap	
Additional Online Mapping Applications	
Online Resources	
Chapter 3: Introduction to ArcExplorer, Projects, and Data Layers	22
Quantum GIS (QGIS - Version 1.6.0 'Copiapó')	
About Geographic Data Types	
Creating a Quantum Project and Adding Data Layers	
Chapter 4: The Map View	30
Opening an Existing QGIS Project	
The Zoom and Pan Toolbar	
Understanding Map Units and Scale	
The Measuring Tool	
What is Metadata?	
Mapping Exercise: Waterbury Parcel Data and Aerials	
Mapping Exercise: Historic USGS Maps of Waterbury	
Online Resources	
Chapter 5: Layer Properties	42
Working with Layer Properties – Symbols	
Drawing Features using Graduated Symbols	
Adding Labels	
Understanding Scale Dependency	
Chapter 6: Understanding and Using Attribute Data, Queries and Analysis	58
Viewing Attributes and Selecting Features	
Spatial Queries: Identifying and Selecting Features on the Map	
Selecting Features using Find	
Buffer Analysis	
Selecting Features using Attribute Queries	
Attributes and Metadata	

Chapter 7: Creating Map Layouts- Printing and Exporting	75
The Basic Map	
The Layout View – Adding Map Elements	
Notes on Finishing the Map	
Printing and Exporting the Map	
Online Resources: Cartography	
Chapter 8: Data Acquisition Methods, Procedures, and Issues	83
Data Acquisition	
Downloading Geographic Data	
Online Data Resources	
Chapter 9: Introduction to GPS.....	90
What is GPS?	
Using the Garmin 60 GPS Receiver	
Collecting Waypoints	
Downloading and Projecting GPS Data	
Using GPS Data With Online Applications and GIS	
Navigating to a Location	
Online Data Resources
